

 Pollet Water Group

MAKE WATER COUNT

HOW OUR JOURNEY BEGAN

Pollet Water Group part of Pollet Group

The Pollet Water Group is part of the Pollet Group, which is active in three sectors: water treatment, swimming pools, and health care. Within these three fields, the Group has companies across Europe, the Middle East and Africa. We work closely with dedicated partners all over the world. Our programme of continuous expansion is based on intensive cooperation with our customers, our striving for sustainable solutions and continuous improvement, and recruitment of talented employees. The Pollet Group is part of Group J. Pollet, which also owns a chain of ten retail stores in franchise with Carrefour.

POLLET GROUP IN A NUTSHELL

Activities: Water, medical and pool

More than 1200 employees

Over 40 companies

Subsidiaries in 14 countries

Founded in 1969

A family-owned business

POLLET WATER GROUP

On a mission to
make water count.

The Pollet Water Group is a worldwide water specialist, offering products, solutions and brands for the home market, hospitality, commercial buildings and industry. We treat the water in your home to protect the piping and your household devices and enhance your water experience. We improve the taste of the water you serve in your restaurant, café or bar. We help your business shift from traditional bottled water to POU drinking water systems and personalised bottles. We protect your professional kitchen equipment and make your crystal shine. We ensure your apartment, school, hospital or office benefits from perfectly treated water and protect your building against the harmful effects of hard water. We offer drinking water solutions for your residents or employees. We design and build water installations for your production plant. We treat water from alternative sources to reduce operating and energy costs and improve your production processes.

JOIN OUR MISSION. MAKE WATER COUNT.

 Pollet Water Group

HOW DO WE MAKE A DIFFERENCE?

We work **through the Pollet Water Group network** with 6 manufacturers and 19 distribution offices. We draw on over 1000 employees, an extensive distribution network with daily shipments, 24/7 delivery, and export capability worldwide. **We invest in product development** by building environmentally friendly solutions, personalised products and collaboration with top brands. **We offer dedicated customer service** with technical support, water analyses, calculations, costings, commissioning and installation. **We focus** on water treatment companies, OEMs, DIY, public authorities and sanitary wholesale.

The Pollet Water Group has companies in 14 countries over Europe and Africa. Thanks to our local presence, we can support our dealers and partners in sales, R&D and logistics. Our headquarter in Belgium is the ideal location to serve customers worldwide. Our warehouses allow us to keep a large number of components and spare parts in stock and minimise delivery times. Thanks to our network of companies, we act locally but think globally. Our local offices have extensive regional market knowledge together with a worldwide presence. We attach great importance to customer service by offering technical support, water analyses, calculations, costings, commissioning and installation. We maintain an extensive stock of components in more than 200,000 m2 of warehouse space.

MANUFACTURING

Crafting your water treatment solutions

The Pollet Water Group is an expert when it comes to water treatment. We supply standard solutions as well as made-to-measure concepts. To maintain our technological lead, we continuously invest in our manufacturers. The Pollet Water Group has production facilities in Germany, France, Turkey, Belgium and the UK. We analyse, design and engineer solutions for your water facilities. We attach great importance to an environmentally and technologically responsible selection of resources. Our R&D teams constantly search for new and sustainable solutions. Our manufacturing capability gives our partners a competitive advantage through highly reliable energy- and water-saving solutions with optimised return on investment. Our manufacturers export worldwide and have global presence.

SUPPORTING OUR PARTNERS

As an international specialist in water treatment with a broad range of products and services for this growing market, we choose our partners very carefully. We cooperate with **water treatment companies, sanitary wholesalers, OEMs, DIY and public authorities**. We have a clear strategy to closely support them with our expertise and solutions. We think globally but act locally. That's why we have subsidiaries in most European countries to work as closely as possible with our local partners. We manufacture, work in partnership with renowned brands, and offer tailored solutions and products. We work white label and customise where needed. Thanks to this strategy, we build on trust and always act as a loyal and long-term partner.

INDUSTRIAL SOLUTIONS
RELIABLE WATER.
RELIABLE PRODUCTS.

PERFECT WATER. PERFECT HOME.

Before your tap water reaches your home, a water company will have already subjected it to various treatments. However, the calcium in your water often builds up scale in pipes, shower heads, steamers, washing machines and dishwashers. The home solutions provided by the Pollet Water Group improve your day-to-day life and enhance your comfort. Our products enable end users to reduce water consumption, save detergents and soap, save energy and ensure maximum return on investment, and ultimately provide better quality of life.

The Pollet Water Group offers IoT solutions to keep your home water softener connected. Our cloud-based platform offers you a high-end solution to access and adjust your water softeners remotely and give your customers a full service solution for a trouble-free softener.

OUR ADDED VALUE

- Wide range of components and solutions
- Extensive stock of spare parts
- PWG proprietary products
- Private label - White label
- Environmentally friendly products
- Strictly B-to-B
- Multi-brand
- Exclusive solutions
- Technical expertise and support
- Worldwide presence

“Our home water solutions improve your day-to-day life and enhance your comfort.”

GREAT WATER. GREAT TASTE.

The Pollet Water Group offers packaged solutions for the hospitality business. We examine every process that involves water in your establishment and offer a solution to create unique water for every need. Our solutions optimise your resources and reduce damage.

Better water not only influences your equipment, but also the taste of your coffee, your tea and your ice. More and more hospitality businesses are shifting from traditional water bottles to drinking water they can produce themselves. Point of use drinking water units eliminate the need to purchase bottled water for your restaurant or bar. They allow you to use personalised bottles and improve your branding. Furthermore, these solutions save a lot of money. Our water filtration systems are available with carbonation, chilling and heating options.

OUR ADDED VALUE

- The taste of perfectly crafted water
- Unique, personalised bottles with your branding
- Optimisation of resources and reduced damage
- Up to 75% savings on chemicals
- Examination of your water processes
- Total protection of your installations
- Reduction of polluting discharges by up to 50%
- Professional technical service, 365 days per year
- Quality audits
- Installation and maintenance protocols
- Tailored financial solutions

“
Our hospitality solutions help you save money and improve your branding.”

SAFE WATER. SAFE BUILDINGS.

Commercial buildings such as apartments, offices and small industrial plants are big water consumers. Your business and buildings rely on the availability of water. Along with growing demand, your water resources need to be protected, safe and of high quality. A business with clean, treated water is a business that saves time and money. Our building products avoid costly replacements due to the damaging effects of hard water. Our engineers develop solutions to treat your water sources with the best possible effect.

In addition, the Pollet Water Group improves your comfort by offering solutions such as smart and user-friendly water coolers. These solutions with patented green technology and proven energy savings will help you reduce the number of bottles you use.

OUR ADDED VALUE

- Wide range of solutions and components for a variety of problem waters
- Personalised solutions allowing our customers to have their own brand
- PWG proprietary products
- Environmentally friendly products
- Technical support
- Assembled units selected by PWG
- Worldwide presence

”

RELIABLE WATER. RELIABLE PRODUCTS.

Water is a precious and universal substance. Without water, there would be no life, no agriculture, and no industry. Industry and agriculture account for 90% of the worldwide demand for water. Our technologies allow you to optimise your water consumption and utilise alternative water sources to reduce operating and energy costs and improve your production process. The Pollet Water Group has acquired valuable experience in the UV sector. UV is a modern chemical-free technology that leaves no taint or residue in the water. UV can also be used in markets such as the food industry for both air and surface treatment, leading to longer shelf life. UV can be used in both clean water applications and in effluent treatment. Other market sectors include agriculture, aquaculture and swimming pools.

OUR ADDED VALUE

- A wide range of package solutions
- Standard range and custom-tailored installations
- Custom-made systems bearing your label
- Mobile water treatment
- Plug and Play modules
- Integrated solutions
- Turnkey projects
